

Kilima Glenn

Business Architecture Senior Analyst | Cloud, AI & Full-Stack Delivery

Summary

Cloud-certified full-stack technologist and AI-enabled delivery lead with experience building scalable applications, analytics platforms, and enterprise automation across cloud, data, and reporting environments. Skilled in React/Next.js, TypeScript, AWS, Power BI, data pipelines, and responsible AI enablement. Known for translating ambiguous business needs into structured solutions, improving reliability of data-driven products, and building practical AI tools that reduce manual effort and help teams move faster with confidence.

Relevant Project Experience

ACN@Meta — AI-Enabled HR & Workforce Insights

Technical Product / Cloud & AI Enablement | 2025–2026

- Supported AI-enabled HR, compliance, and workforce dashboards; coordinated delivery across product, data engineering, visualization, and stakeholder groups (100% chargeability).
- Worked with Power BI, AWS S3/Redshift storage, and automated ingestion pipelines to improve reporting reliability and reduce manual data handling.
- Supported Responsible AI/GLR readiness and enabled the Amethyst Meta Hub AI assistant (RAG-based) through knowledge-base design, testing, and user guidance.

McDonald's — Cloud Network Operations & Digital Experience

Frontend / AWS Cloud Engineer | Aug 2024 – Jul 2025

- Architected a React/Next.js 14 platform and design system with 30+ reusable enterprise components; improved performance 40%.
- Built AWS Amplify Gen 2 backend: 25+ GraphQL models, 15+ Lambda functions, Step Functions, and real-time DynamoDB integration.

AI Learning Studio — Developer Enablement Platform

Personal AI + Full-Stack Initiative | 2026

- Built an AI-powered platform generating modular, code-along curricula to upskill analysts in cloud, AI, and modern development.
- Focused on responsible AI adoption and practical tooling (LangChain, Claude Code, AWS AI, MCP patterns).

Sustainability Dashboard & Pulse Check AI (A11y Reporting)

Full-Stack Developer | 2023 – 2024

- Built chart-rich sustainability features (AWS, NestJS, Node.js, IBM Carbon, Figma) with data-driven design and deployment.
- Delivered accessibility-first reporting with AI-assisted analysis for compliant, site-wide recommendations.

Chicago

Skills

- React / Next.js / TypeScript
- Node.js / Python
- AWS (Amplify, Lambda, S3, Redshift, DynamoDB, Step Functions)
- GraphQL / REST APIs / CI/CD
- Power BI / Data Validation / Pipelines
- Prompt Engineering / RAG / GenAI Enablement
- Amethyst Studio / Copilot for Power BI
- Responsible AI / GLR Support
- SQL / NoSQL
- Agile / Scrum / Stakeholder Coordination
- Accessibility / Sustainability

Certifications

- AWS Cloud Certification (renewed)
- AI Certification / AI Development
- AI for America's Analyst Training
- GenAI, Responsible AI, Prompt Engineering
